

WHAT IS...ANXIETY?

Anxiety is when something causes us to feel nervous and afraid. People who have an Anxiety disorder have a more intense reaction. It can start to impact their grades, behaviors, and relationships with others.

ANXIETY CAN BE CAUSED BY A NUMBER OF THINGS. SOME PEOPLE EXPERIENCE IT FOR NO REASON. OTHERS ARE TRIGGERED BY TESTS, BEING ON STAGE, OR BEING AROUND OTHER PEOPLE. SUFFERING FROM ANXIETY CAN MAKE YOU WANT TO AVOID CERTAIN SITUATIONS AND PLACES.

Symptoms

- Worrying a lot
- Feeling very nervous and afraid
- Trouble breathing
- Numbness or tingling in your hands or feet
- Feeling dizzy
- Feeling very weak
- Sweating
- Headache or stomach ache
- Heart beating really fast
- Muscles feel really tight
- Having a lot of thoughts going through your head

Treating Anxiety

MENTAL HEALTH THERAPY

A therapist can help someone suffering from anxiety learn how to better cope with their symptoms so that they are not as intense. It can also be helpful to talk about the triggers to see why they cause anxiety for that person.

MEDICATION

Medication won't cure anxiety, but it can help to decrease the symptoms.

SELF-HELP

Someone suffering from anxiety can help lessen some of their symptoms by doing certain things on their own. Doing relaxation, eating healthy, and getting sleep are helpful ways to decrease anxiety.

IF YOU FEEL LIKE YOUR ANXIETY IS MORE THAN IT SHOULD BE, OR IF IT STARTS AFFECTING CERTAIN AREAS OF YOUR LIFE, TALK TO A PARENT OR A TRUSTED ADULT!
